Dr. Hockmann w Rocchi Dental Office Renovation - La Plata, MD

Polt Design Group teamed up with Rocchi Construction for this design/build project. The 1,500 square foot space of the existing Dental Suite was renovated to include four operatories, upgraded finishes and an improved layout.

Because of the teamwork between PDG and Rocchi Construction, all plumbing work was completed without saw cutting or core drilling the floor slab; keeping the costs down for the client. The result of this renovation was a more functional space that better suited the needs of the staff, and a more open office with welcoming, contemporary finishes.
